

Present: D. Esperante, A. Gallas, P. Rodríguez, E. Pérez, P. Vázquez, A. Pazos, B. Adeva, J. Caride, J. Visniakov.

DEPFET:

- S3B system properly working and controllable from Jevgenij's laptop. Data has been taken with/without a radiation source.
- Data analysis software has to be installed to analyze the data.
- Carmen will help Javier and Pablo in the analysis of the 2009 DEPFET testbeam.

VeLo module:

- PA to sensor bonding is missing. Abraham will pass Eliseo the map of channels to instrument. IV and/or CV curves?

ST:

- The upgrade of the new TT projects is ongoing.

ST TED runs:

- The TEDs were finished and the whole planning had to be reduced to 2 time scans for 2 HV settings. Also a time scan with the Beetle optimized settings was done.
