

## **Minutes of USC Instrumentation meeting on 22-04-2010**

**Present:** J. Caride, J. Visniakov, P. Vázquez, D. Esperante, E. Pérez, A. Gallas, J. Saborido, B. Adeva, P. Rodríguez.

### **1) DEPFET**

#### **Outcome of DEPFET meeting in Gottingen (P. Vázquez)**

EVO connection was not working properly. USC could not connect and present their ideas about the analysis. There are pending e-mail conversations with M. Voss.

#### **Status of DEPFET Test-beam Analysis (J. Caride):**

Javier presented the status of the analysis. He uploaded a presentation.

#### **Status of DEPFET tests at Santiago (J. Visniakov):**

It seems from the last tests that the matrix is not working properly.

#### **Status of Belle LV design prototype (P. Vázquez, J. Visniakov):**

FPGA evaluation board ordered. In 10 days the board should be in Santiago.

### **2) News from collaboration with CNM on thinning of 2D pixel sensors. (Abraham 5min)**

A. Gallas reported on the status of the thinning project with CNM. The bump bonding tests will start next week.

### **3) PR01 tests and preparation for the next test-beam in May)**

The PR01 is being readout. Several tests have been performed.
